

makenext.io scopes

MVP

- Makers can create a profile page
 - Location
 - Skills
 - Tools at their disposal
 - Basic showroom (list of successful gigs and past projects)
- Users can post listings and makers can apply to those
 - One or more tags can be associated (such as `#lasercutting`, `#cnc`, `#textile`, etc.
 - Poster can restrict to a certain locations (city, country) or leave it open
- Users can filter listings by tag or location
- Makers can apply to job listings
 - OP receives email notification with contact details
 - OP can decide to get in touch with them
- Users who are not signed up with makenext can see the job listings, but cannot apply
- No payment baked into the platform; donations or "tips"

Post MVP

- Payment baked into the platform
- Section where makers can find other makers to collaborate on hobby and for-profit projects. The use case would be if I wanted to build a motorized long board and don't know anything about electronics, but can do everything else. This is where I would find another maker with a complementary skillset.
